Outcomes of the review

Summary of main findings

Issues that were agreed to be addressed

Examples of good practice

Notes

The aim of this form is to provide:

- Evidence that a review has taken place
- Indications of good practice that may be of help to other churches and projects
- Provide information that can be collated to give an overview of city centre work throughout the connexion.

It is expected that churches and projects will keep much fuller records of their own reviews to inform their decisions and plans in the months and years ahead.

- If this form is found to be unduly restrictive then the author of the report may lay out the report as they wish using the above as a guide.
